

# Keg Master

## Model: Grand Deluxe

*You wanted a larger, more powerful kegerator. Now you can have it!*

## Size Does Matter

The Grand Deluxe is a commercial grade under counter keg fridge that has been purpose built for kegs. Almost all other under counter fridges are too low in height to accommodate for full size kegs. The height of the Grand Deluxe is also a suitable height to be used as a bar itself.

The Grand Deluxe has been manufactured to suit beer enthusiasts, small bars, cafés and restaurants. It is also ideal as a portable service bar for trade shows or temporary events where the bar can simply be wheeled into place and is ready to use. It is fully clad with stainless steel and will look great in any environment.

The powerful compressor and digital temp controller allows you to adjust the temp from -5C and up to 45C while the dual internal air circulation fans ensure the temp inside the fridge is perfectly even with no warm spots.

The Grand Deluxe includes removable shelving so it can be used as an under counter fridge or half fridge and half keg fridge.

The Grand Deluxe does not include any font/taps so you will have to fit these yourself but this is a relatively straight forward job.

The bottom of the fridge slants slightly toward the drain hole where you can remove a bung (shown to right). This makes wash down and cleaning a simple job.

The capacity of this unit is 500L and it will hold a massive 12 x standard Cornelius 19L kegs, or 3-4 x 50L kegs.

## Specifications

- 500L Capacity
- 1 Radiator fan and 2 Evaporator fans
- Fully clad in 304 Stainless Steel inside and out
- Includes castor wheels (rated to 300kg)

## Fitting the Grand Deluxe with taps

The Grand Deluxe does not include taps as there are various tap assemblies that can be used. Single or multiple fonts can be fitted fairly easily using a hole saw, some drill bits and 80mm M7 bolts. If you require the Grand Deluxe to be fitted with fonts this can be done for you.

## Delivery

The Grand Deluxe comes packed on its end and strapped to a pallet. For this reason you will require a delivery address that has a fork lift on site.
